Bulb Trim profiles are dual durometer rubber seals with separate bulb and retainer sections. Typically, the bulb is made of a medium-density foam or sponge rubber such as EPDM.

Edge trim selections include different grip-styles, from interior tongues, wire cores to segmented cores that offer additional impact resistance. You can also buy trim seals that are cut-to-size.
Edge Trim selections include different grip-styles, from interior tongues, wire cores to segmented cores that offer additional impact resistance. You can also buy trim seals that are cut-to-size.

**Edge Trim**

**Part #: ES28-210-P80**
Tolerance: RMA-E2  
Material: PVC  
Color: Black  
Duro: 80±5  
Min. Order: 45M (150FT)

**Edge Trim**

**Part #: ES28-215-P80**
Tolerance: RMA-E2  
Material: PVC  
Color: Chrome  
Duro: 80±5  
Min. Order: 45M (150FT)

**Edge Trim**

**Part #: ES28-280-P80**
Tolerance: RMA-E2  
Material: PVC  
Color: Black  
Duro: 80±5  
Min. Order: 30M (100FT)

For pricing, lead times & custom design options, contact sales@elastoproxy.com
U-Channel Profiles are used in finishing as an edge protector generally for sheetmetal or rough edged parts. These seals also have cosmetic uses.

For pricing, lead times & custom design options, contact sales@elastoproxy.com
D-shaped seals provide sealing under pressure, such as when the door to a mobile equipment cabin or machine enclosure is shut. The flat part of the seal attaches with an adhesive instead of mechanical fasteners.
Windows channels are designed for equipment that contain specific types of window glass. These rubber products seal out wind and weather while reducing or eliminating noise and vibration.

Window Channel

**Part #: ES36-014-E70**
- Tolerance: RMA-E2
- Material: EPDM
- Color: Black
- Duro: 70±5
- Min. Order: 76M (250FT)

Window Channel

**Part #: ES36-034-E70**
- Tolerance: TBA
- Material: EPDM
- Color: Black
- Duro: 70±5
- Min. Order: 76M (250FT)

Window Channel

**Part #: ES35-019-E60**
- Tolerance: RMA-E2
- Material: EPDM
- Color: Black
- Duro: 60±5
- Min. Order: 76M (250FT)

Window Channel

**Part #: ES35-020-E70**
- Tolerance: TBA
- Material: EPDM
- Color: Black
- Duro: 70±5
- Min. Order: 91M (300FT)

Window Channel

**Part #: ES35-022-E65**
- Tolerance: RMA-E3
- Material: EPDM
- Color: Black
- Duro: 65±5
- Min. Order: 45M (150FT)

Channel Lock

**Part #: ES38-002-E80**
- Tolerance: RMA-E2
- Material: EPDM
- Color: Black
- Duro: 80±5
- Min. Order: 76M (250FT)

For pricing, lead times & custom design options, contact sales@elastoproxy.com
D-shaped seals provide sealing under pressure, such as when the door to a mobile equipment cabin or machine enclosure is shut. The flat part of the seal attaches with an adhesive instead of mechanical fasteners.
The top part of an E-Shape seal is a half-moon bulb that supports compression. The bottom of the seal has a flat, straight tail. The middle of the E-seal contains a slot where the installer inserts metal bar stock.

E-Shape
Part #: ES14-001-S60B
Tolerance: RMA-E2
Material: Silicone
Color: Black
Duro: 60±5
Min. Order: 38M (125FT)

E-Shape
Part #: ES14-125-C70
Tolerance: RMA-E2
Material: SBR
Color: Black
Duro: 70±5
Min. Order: 48M (160FT)

E-Shape
Part #: ES14-475-S60
Tolerance: RMA-E3
Material: Silicone
Color: Light Grey
Duro: 60±5
Min. Order: 76M (250FT)

For pricing, lead times & custom design options, contact sales@elastoproxy.com
P-shaped seals have a rounded bulb and a flat stem. The bulb provides sealing under compression. The stem or tail is used for attaching the gasket to a substrate.

**P-Shape**

**Part #: ES20-006-E60**
Tolerance: RMA-E2
Material: EPDM
Color: Black
Duro: 60±5
Min. Order: 60M (200FT)

**P-Shape**

**Part #: ES20-055-E70**
Tolerance: RMA-E2
Material: EPDM
Color: Black
Duro: 70±5
Min. Order: 73M (240FT)

**P-Shape**

**Part #: ES20-092-E70**
Tolerance: RMA-E3
Material: EPDM
Color: Black
Duro: 70±5
Min. Order: 76M (250FT)

For pricing, lead times & custom design options, contact sales@elastoproxy.com
Insulation and matting protects equipment and operators against heat, noise, vibrations, and environmental conditions.

**Floor Matting**

**FMD-500-60-ZM**

**Layers:**
Contains a layer of acoustical foam that's bonded to a sound barrier.

**Description:**
The top of this barrier material features a durable, wear-resistant, diamond plate design.

**FM-625-50-ZM**

**Layers:**
A single layer of open or closed cell foam combined with a plastic barrier.

**Description:**
Features a weather-resistant pebbled surface and provides superior impact strength.

**Cab Insulation**

**SH-500-PVTG**

**Layers:**
A single layer of open or closed cell foam combined with a plastic barrier.

**Description:**
The perforation pattern has maximum absorption and mechanical resilience with 14% open area.

**SH-1000-54-PVTBL**

**Layers:**
Sandwiches a thick layer of polyether or polyurethane foam between a PVC-coated fabric facing and a removable liner with PSA adhesive.

**Description:**
The material contains a series of small holes for enhanced noise control.

**SH-1000-54-ZZUT**

**Layers:**
A sound-absorbing foam that's heat-laminated to a urethane film.

**Description:**
These films and facings come in different colors.
Insulation & Matting

Insulation and matting protects equipment and operators against heat, noise, vibrations, and environmental conditions.

Engine Compartment Insulation

**Layers:**
This three-layer composite sandwiches a layer of silicone foam between a reinforced fabric facing and a removable liner with a PSA adhesive.

**Description:**
Provides strong resistance to chemicals, oils, and mildew.

**SH-500-58-ZMT**

**Layers:**
Sandwiches a vibration damper between acoustical foams and includes a metal foil facing that reflects radiant heat.

**Description:**
Thermal-acoustic insulation for maximum sound attenuation over a broad frequency range.

**SH-625-54-ZTBRA**

**Layers:**
A lightweight, fire-resistant melamine foam that can be combined with various facing materials and PSA liner's.

**Description:**
Combines high-temperature resistance with superior sound-absorbing properties.

**SH-2000-48-MEZT**

Insulation Sample Bag

Do you need thermal, acoustic, or thermal-acoustic insulation for forestry, mining, construction, or other types of mobile equipment? Maybe you need cabin flooring or floormats instead.

**Ask about our insulation sample bag** and learn how Elasto Proxy can not only provide the material, but can also cut it to size for your specifications or requirements.

Sample Offers

Discover the ideal profile extrusion with the Elasto Sample Kit. Experience the different types of adhesive backed sponge profiles with the Elasto Sponge Kit. These profiles are in-stock and available for next-day shipping.

Elasto Sponge Kit

Do you need sponge rubber profiles for sealing, cushioning, or shock absorption? Elasto Proxy has an offer you won’t want to miss.

The Elasto Sponge Sample Kit contains:
Medium-density sponge rubber profiles that feature UV parts marking and our heat activated taping system (HATS).

With soft, compressible profiles like this, you can get gaskets that avoid compression set, reduce parts picking errors, and speed installation times.

Elasto Sample Kit

For rubber extrusion shapes and gasket profiles, this sample kit is the ultimate kit for you to discover the perfect profile for your application.

The Elasto Sample Kit includes:
- Bulb trim, edge trim, & sponge profiles.
- P-shape, U-shape, or E-shape extrusions.
- Locking, self-locking and zipper profiles.
- Durometer keychain tool.

Elasto Proxy stocks standard rubber profiles that are available for distribution or fabrication.
Discover the ideal profile for your build or assembly.
