

# Value-Added Services for Lean Manufacturing

## Forecasting

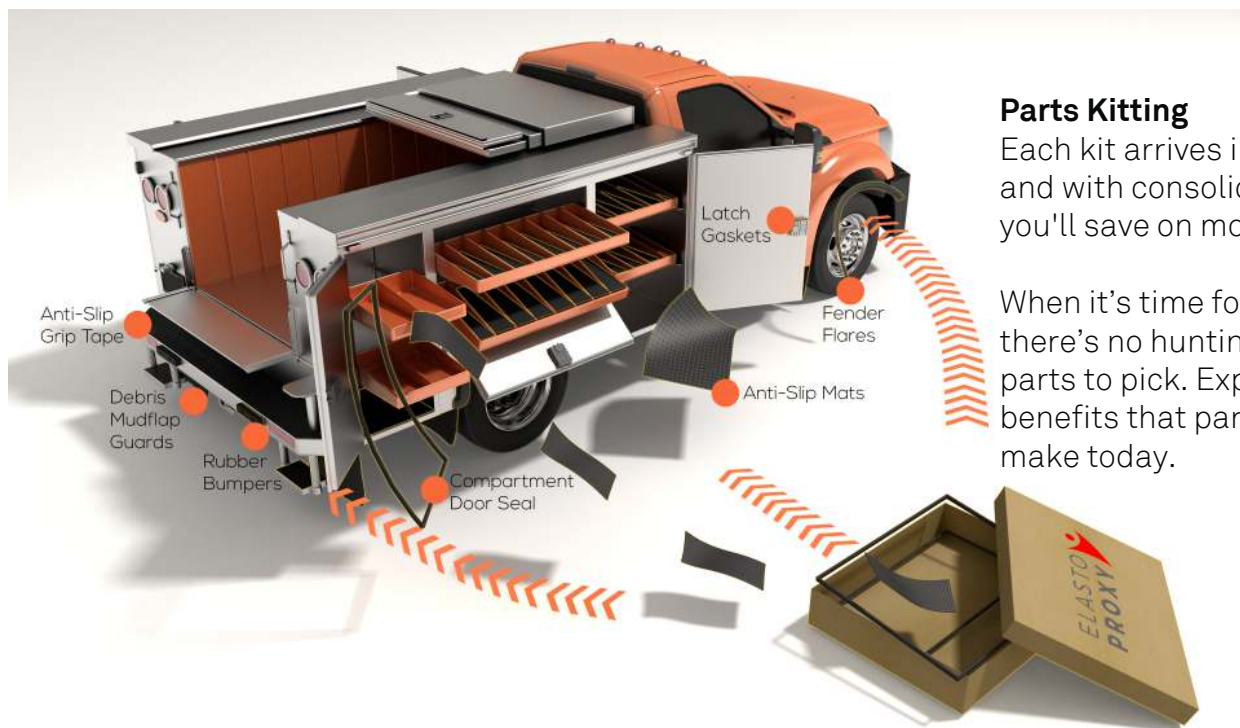

Rising shipping costs and port delays are just part of what's making inventory management a daily challenge. By taking a more proactive approach to forecasting, however, you reduce risks and control costs. If you send us your sales forecast and issue us a blanket P.O., we can integrate your forecast with our MRP system.

## Warehousing

Elasto Proxy's warehousing services help you to reduce risks and control costs. We also make it easy to get all of the rubber and plastic products that you need from a single supplier.

From rubber coils to finished gaskets and from plastic parts to thermal-acoustic insulation, Elasto Proxy is your one-stop solution for sealing out supply chain problems and insulating against uncertainty.

## Parts Kitting

Each kit arrives in its own box and with consolidated shipments you'll save on money.

When it's time for assembly, there's no hunting for the right parts to pick. Experience the benefits that part kitting can make today.

Bulb Trim Seals

Edge Trim

Solid Profiles

Insulation (Thermal & Acoustic)
