

## Silicone Hose Connectors

Single-source your supply of industrial rubber products for heavy equipment, automotive, and electric vehicles.

- Elbows with strong, flexible bends
- Reducers are for different-sized pipes or tubes
- Straight hoses in coils or cut-to-size lengths
- Hump hoses for slight intake adjustments
- Wrapped hoses for enhanced pressure resistance
- Custom hose connectors for specialized applications

Elasto Proxy supplies standard and custom silicone hose connectors.

We have the products you want with the features you need.

- Fabric reinforcements in multi-ply polyester or aramid
- Metal wire reinforcements for vacuum pressures
- Fluorcarbon liners for added fuel and chemical resistance
- Connectors for high and low temperatures and pressures
- Compliance with SAE, MIL-SPEC, and OEM standards
- Red, blue, and black hoses for easy visual recognition
- EPDM inserts available

### Elbows with strong, flexible bends

- 45° and 90° angles Faster cuts in more sizes
- Odd angles and reducer elbows
- Molded bends for dependable flexibility
- Multi-ply polyester and aramid reinforcements
- High and low-temperature resistance

### Reducers are for different-sized pipes or tubes

- Smooth transitions for reliable performance
- Intercoolers, turbochargers, and superchargers
- Intake pipes to throttle body assemblies
- Air metering assemblies
- Custom compressors

### Straight hoses in coils or cut-to-size lengths

- Metal clamps for easy attachment
- Fabric reinforcements for added strength and resistance
- Stainless steel rings for reduced swell
- Cut them yourself or buy cut lengths

### Hump hoses for slight intake adjustments

- Compensate for minor misalignments
- Support slight intake adjustments and bends
- Use with the hot and cold sides of engines
- Fluorocarbon liners for petrochemical residues
- Aramid-reinforcements for heat resistance

### Wrapped hoses for enhanced pressure resistance

- Wrapped with nylon fabric strips
- Textured finishes with ridges
- Increased abrasion resistance
- Support for larger diameters
- Temperature and burst resistance

### Custom hose connectors for specialized applications

- Heater hoses
- Coolant hoses
- Vacuum hoses
- Custom dimensions
- Custom reinforcements and liner materials
